

Los Angeles to Get Next Meet Of A.H.A.D.B.

City of Angels Declared to Have Best Chance of Securing 1916 Session of Spanish-American Alliance.

The fourth day of the session of the grand lodge of the Alianza Hispano-Americana, which convened here Monday, was spent today in executive session. It is understood the only business transacted was amendments and new rules and other matters pertaining to the secret work of the order.

The election of officers and place of meeting in 1916 will probably take place tomorrow. Los Angeles is the city most likely to secure the next convention according to rumors on the outside today.

A banquet given last night at the armory to the lodge members and their friends was one of the most successful ever held in this city. The Elks' club cafe served the dinner.

Warm addresses of welcome to the delegates were made by Major D. H. Boutright and Clark M. Carr, president of the Commercial club, who occupied seats of honor. President Brown, head of the order, responded to these addresses, evoking hearty applause.

Nestor Montoya, president of the local branch, acted as toastmaster.

Among the speakers not listed on the program earlier in the evening was Frank Hubbell, who spoke on "No Religion and No Religion in the Alliance," and made a strong impression on his audience.

A large number of ladies were present and Mrs. Laria J. A. Perout of Silver City delivered an address which was one of the most interesting features of the program.

After the speeches had been concluded the floor was cleared and dancing was enjoyed until about midnight.

Plan Is Afoot To Buy Section Below Boundary

Scheme to Acquire Strip of Mexican Territory Has Been Broached to President; No Indication of Attitude.

(By Evening Herald Leased Wire) Washington, Jan. 20.—Advisability of the United States seeking to acquire a portion of northern Mexico by purchase or treaty, it was learned today, is being urged by American citizens along the border and has been recently discussed with President Wilson. Senator Ashurst of Arizona, who saw the president yesterday is said to have broached the subject. The Arizona senator today would not discuss the matter.

Mexican problems were not discussed in the senate today. Senator Sherman's resolution of inquiry as to whether the United States made any agreement with Central or south American countries not to intervene in Mexico without their consent was referred to the foreign relations committee without debate.

Hoke Smith Hot In Denunciation Of British Acts

Interference With Neutral Trade Scored by Senator From Georgia, Who Pleads for Definite Action.

(By Evening Herald Leased Wire) Washington, Jan. 20.—Great Britain's interference with neutral trade was the subject of a vigorous and exhaustive speech in the senate today by Senator Hoke Smith of Georgia, who pleaded for action to prevent England from advancing her own trade at the expense of the United States while attempting to destroy Germany commercially.

Senator Smith declared the rights of citizens of the United States and other neutral nations were being recklessly disregarded and emphasized particularly what he denounced as Great Britain's lawless treatment of America's cotton trade. Discussing the action of the allies in proclaiming cotton as contraband, the senator asserted cotton had not been used or needed by Germany or her allies in the manufacture of war munitions for more than eight months. He quoted from a statement prepared for him by Howard W. Bibble, now in Washington after a trip to Germany, who reported that he had learned through personal investigation that Germany had developed a process for using wood pulp as a cheaper and more effective substitute for cotton in the manufacture of explosives.

Senator Smith reviewed the history of interferences with trade and diplomatic exchanges on the subject. British authorities were quoted also to prove that under international law foodstuffs are subject to seizure on, when consigned to armed forces of an enemy.

Referring to a statement made Sir Finlay to their parliament in 1911 that "no country, however powerful, would incur the displeasure and possible hostility of such a power as the United States by putting forward an unfounded claim to treat food brought to Great Britain as contraband of war," Senator Smith added:

"I wonder what he thinks of the United States now, when we submit not only to the seizure of vessels destined to German ports carrying foodstuffs, but to the seizure of vessels destined to neutral ports of Holland and Sweden, and permit Great Britain, disregarding rules of international law by orders from the privy council, to confiscate cargoes of non-troops belonging to citizens of the United States with no proof whatever that they were intended for the military or naval forces of Germany."

Germany and Austria have a population of over 110,000,000 people. It is estimated perhaps 10 per cent of these are under arms. Certainly more than 30,000,000 people in these two countries are non-combatants. By every rule of international law citizens of the United States have the right to ship to these non-combatants for their use through the neutral ports of northern Europe all the foodstuffs they wish to buy. The same is equally true of raw cotton."

Naval Court Is Not Pleased by Witness' Talks

Miller Reese Hutchinson, Engineer for Edison Storage Battery Company, Cautioned Not to Give Interviews.

(By Evening Herald Leased Wire) New York, Jan. 20.—The naval court of inquiry into the cause of the recent fatal explosion on the submarine E-2 today cautioned Miller Reese Hutchinson, engineer for the Edison Storage Battery company, which supplied the submarine batteries against giving out any more interviews regarding the accident until the conclusion of the investigation.

This action, taken by Captain Wm. H. G. Bullard, president of the court, grew out of an interview given by Hutchinson yesterday in which he expressed the opinion that the explosion would not have happened if the craft's ventilating system had been in full operation.

Mr. Hutchinson, who was called to stand as a witness was told that the Edison battery was not on trial. He answered a number of technical questions and was succeeded on the stand by J. A. Spillman, a naval constructor at the New York navy yard.

The latter testified that the ventilation system which was in the submarine at the time of the explosion had been installed under the direction and approval of the Edison company.

DR. FRISBIE IS NEW PRESIDENT OF THE ALBUQUERQUE Y. W. C. A.

Dr. Evelyn Frisbie last night was elected president of the Y. W. C. A. at a meeting of the board of directors to organize for the year's work. Other officials elected were:

Vice president, Mrs. R. H. Ives; Secretary, Mrs. Roy Strom; Treasurer, Mrs. H. F. Laessell.

Work will be begun to make the opening year the best in the history of the association here as soon as standing committees are appointed.

Under the leadership of Mrs. N. A. Purcell the new gymnasium class was started Tuesday night. Other classes will be announced later.

At the annual meeting of the Y. W. C. A. last Monday evening reports for the last year were given and showed that the association was trying to do an active work under disadvantages and that the time had come when the workers must look for more commodious quarters if it is to do the work called for.

In the employment department since September there have been 53 applying for employment, 45 wishing help and 45 have been placed, to say nothing of the many taken care of until employment could be found.

A turkey dinner prepared by Mrs. J. H. Perrin, lunch room director, was served to about 70 members and friends during the evening.

ITS MEANING.

Dididally (a chorus procrastinator) — dreamed last night that I—er—sh! — projected to you. I wonder what that is the sign of?

Miss Lingertong (desperately)—It is a sign that you have got more sense when you are asleep than when you are awake!
